Retail Performance Analytics

Power BI Report & Excel Dashboard for a Multi-Branch Retail Business

Power BI · Excel · Power Pivot · DAX · Power Query

Mazen Mohsen

Senior Data & Merchandise Analyst · 2026

Project Overview

A two-part retail analytics project for a multi-branch business. Part 1 is a multi-page Power BI report covering sales, inventory, forecasting, store comparison, financials, and purchase orders. Part 2 is an Excel dashboard on a Power Pivot data model covering sales KPIs, inventory health, and like-for-like sales with forecast. Together they turn raw sales, stock, and purchasing data into one view of branch, category, and vendor performance.

Part 1 · Power BI Report

- 10 report pages with button navigation
- Sales, daily, and YoY / WoW analysis
- Inventory, stock-to-sales, sell-through
- Forecasting and key-influencers (AI)
- Store comparison, financials, and POs

Part 2 · Excel Dashboard

- Sales KPIs, quarter view, top stores
- Inventory value, low stock, old season
- LFL MTD / YTD and monthly forecast
- Power Pivot data model with DAX
- Slicers: year, month, store, vendor

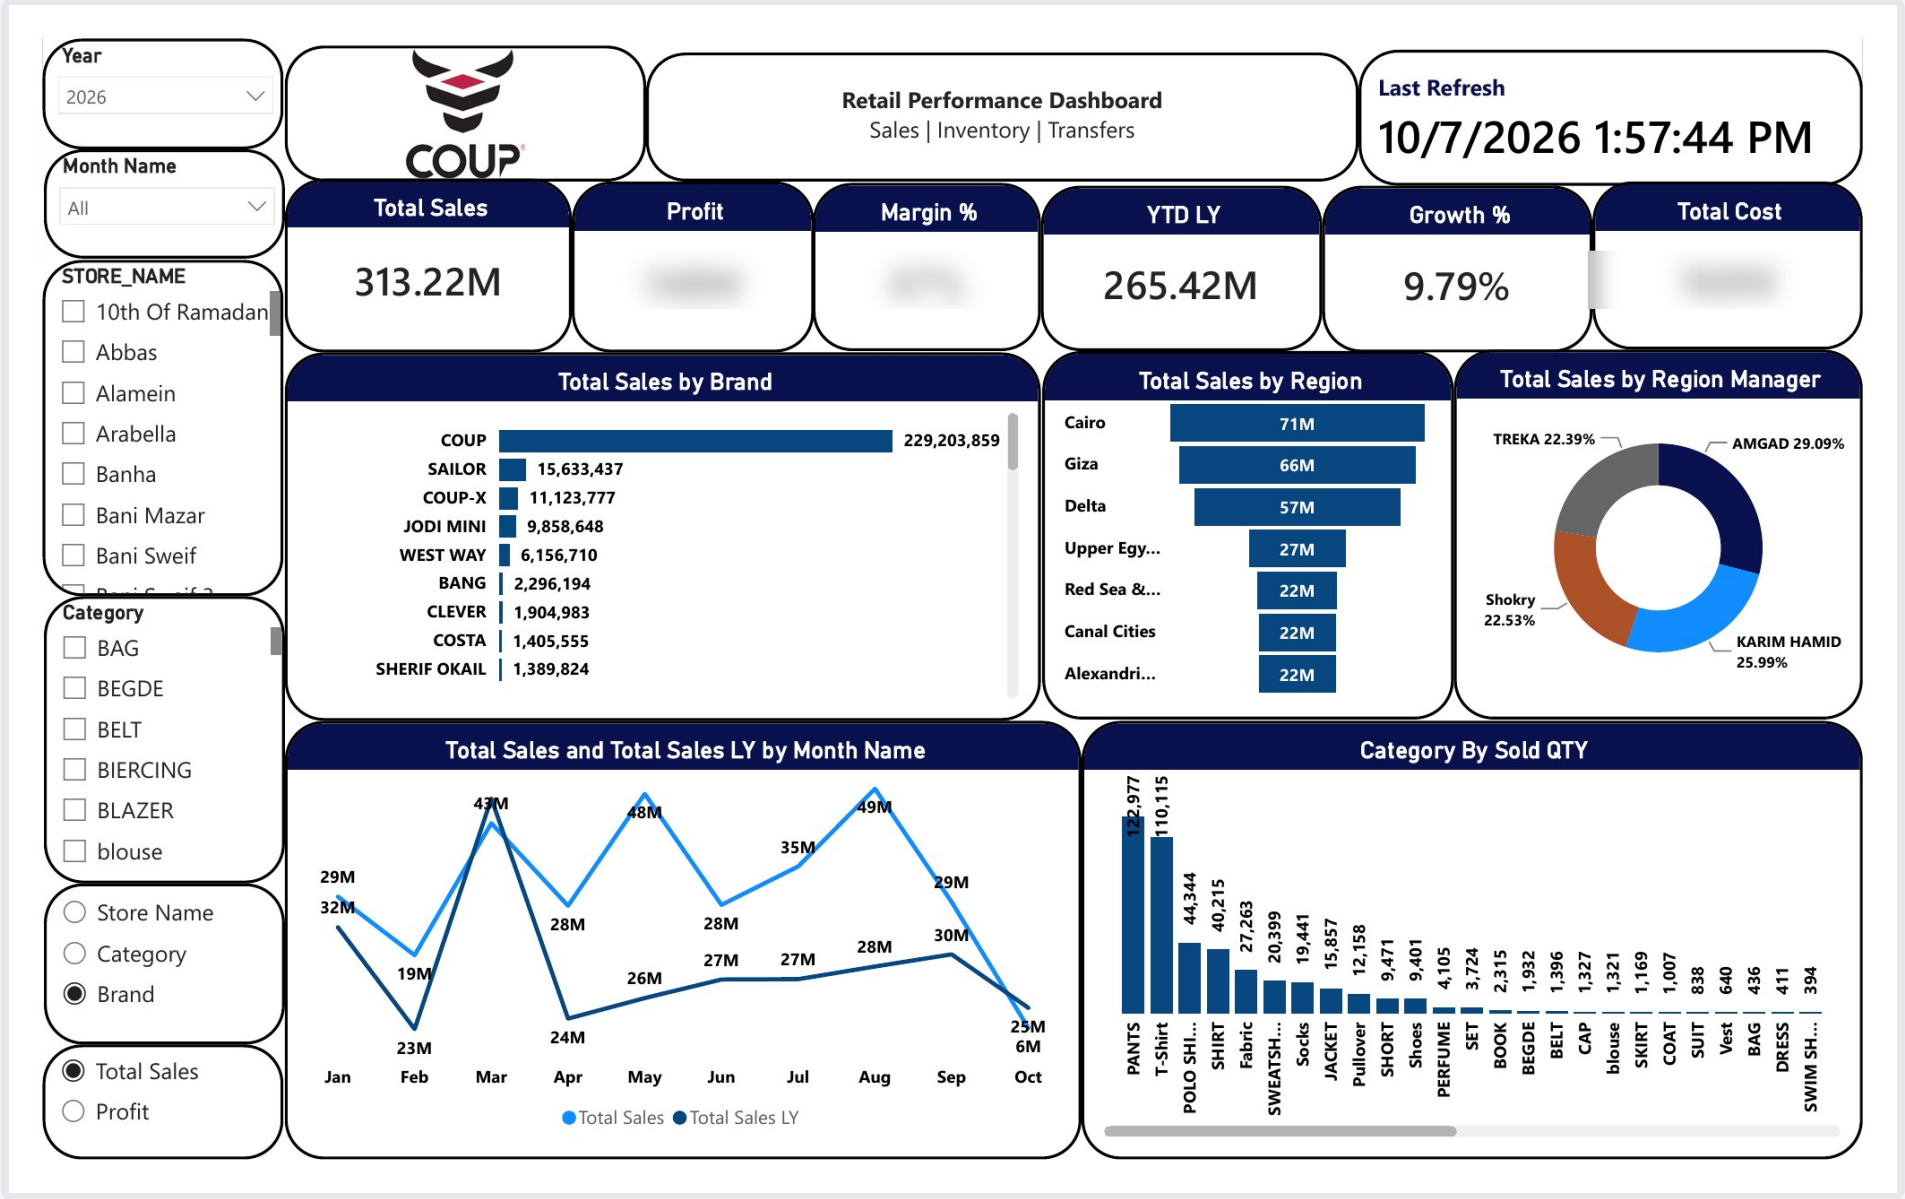

Tools

Power BI Desktop · DAX · Power Query · Microsoft Excel · Power Pivot · SQL

Note: profit, margin, cost, salary, and bonus figures are blurred in this public version; all monetary amounts are blurred in Part 2.

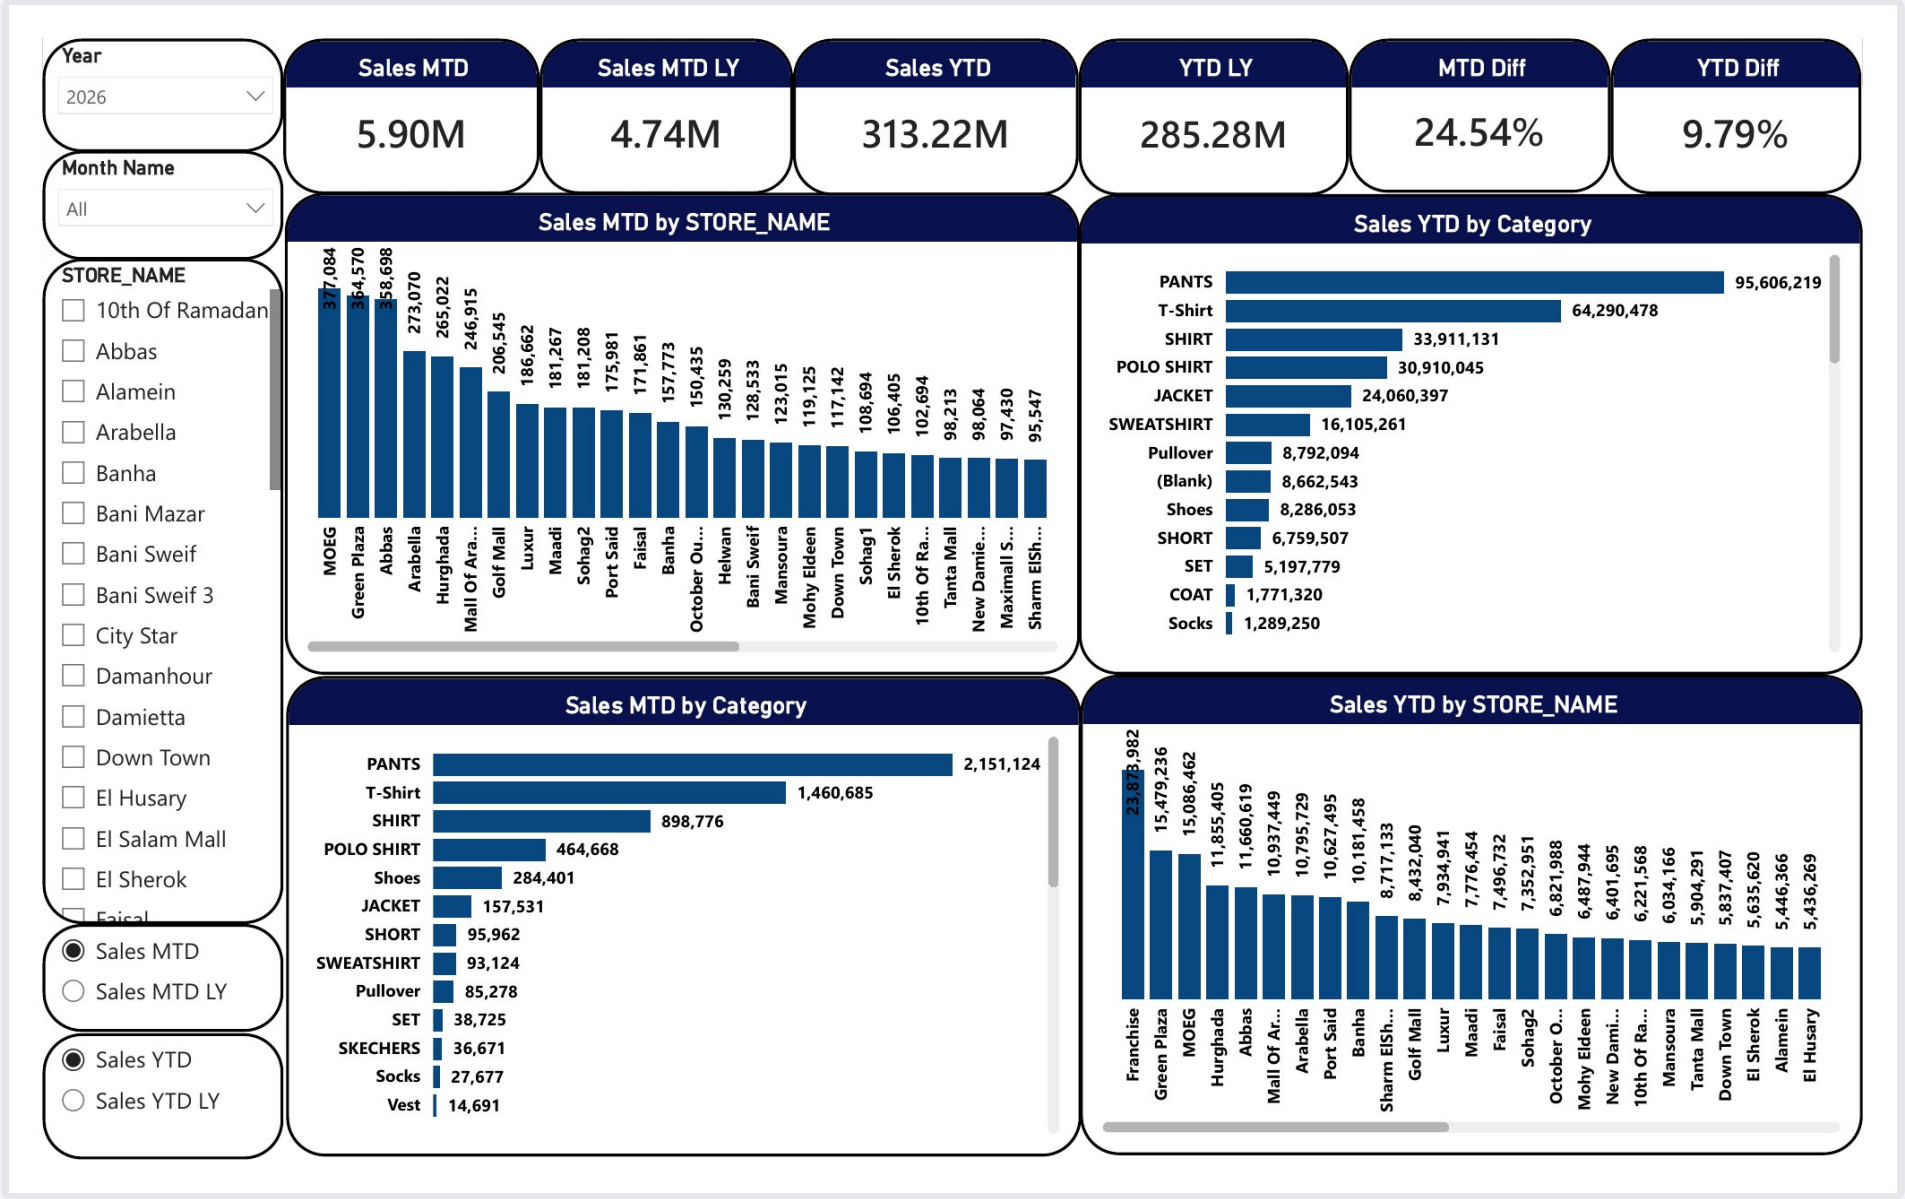

Executive Dashboard

Total sales, growth vs last year, sales by brand, region, and region manager, monthly trend, sold quantity by category

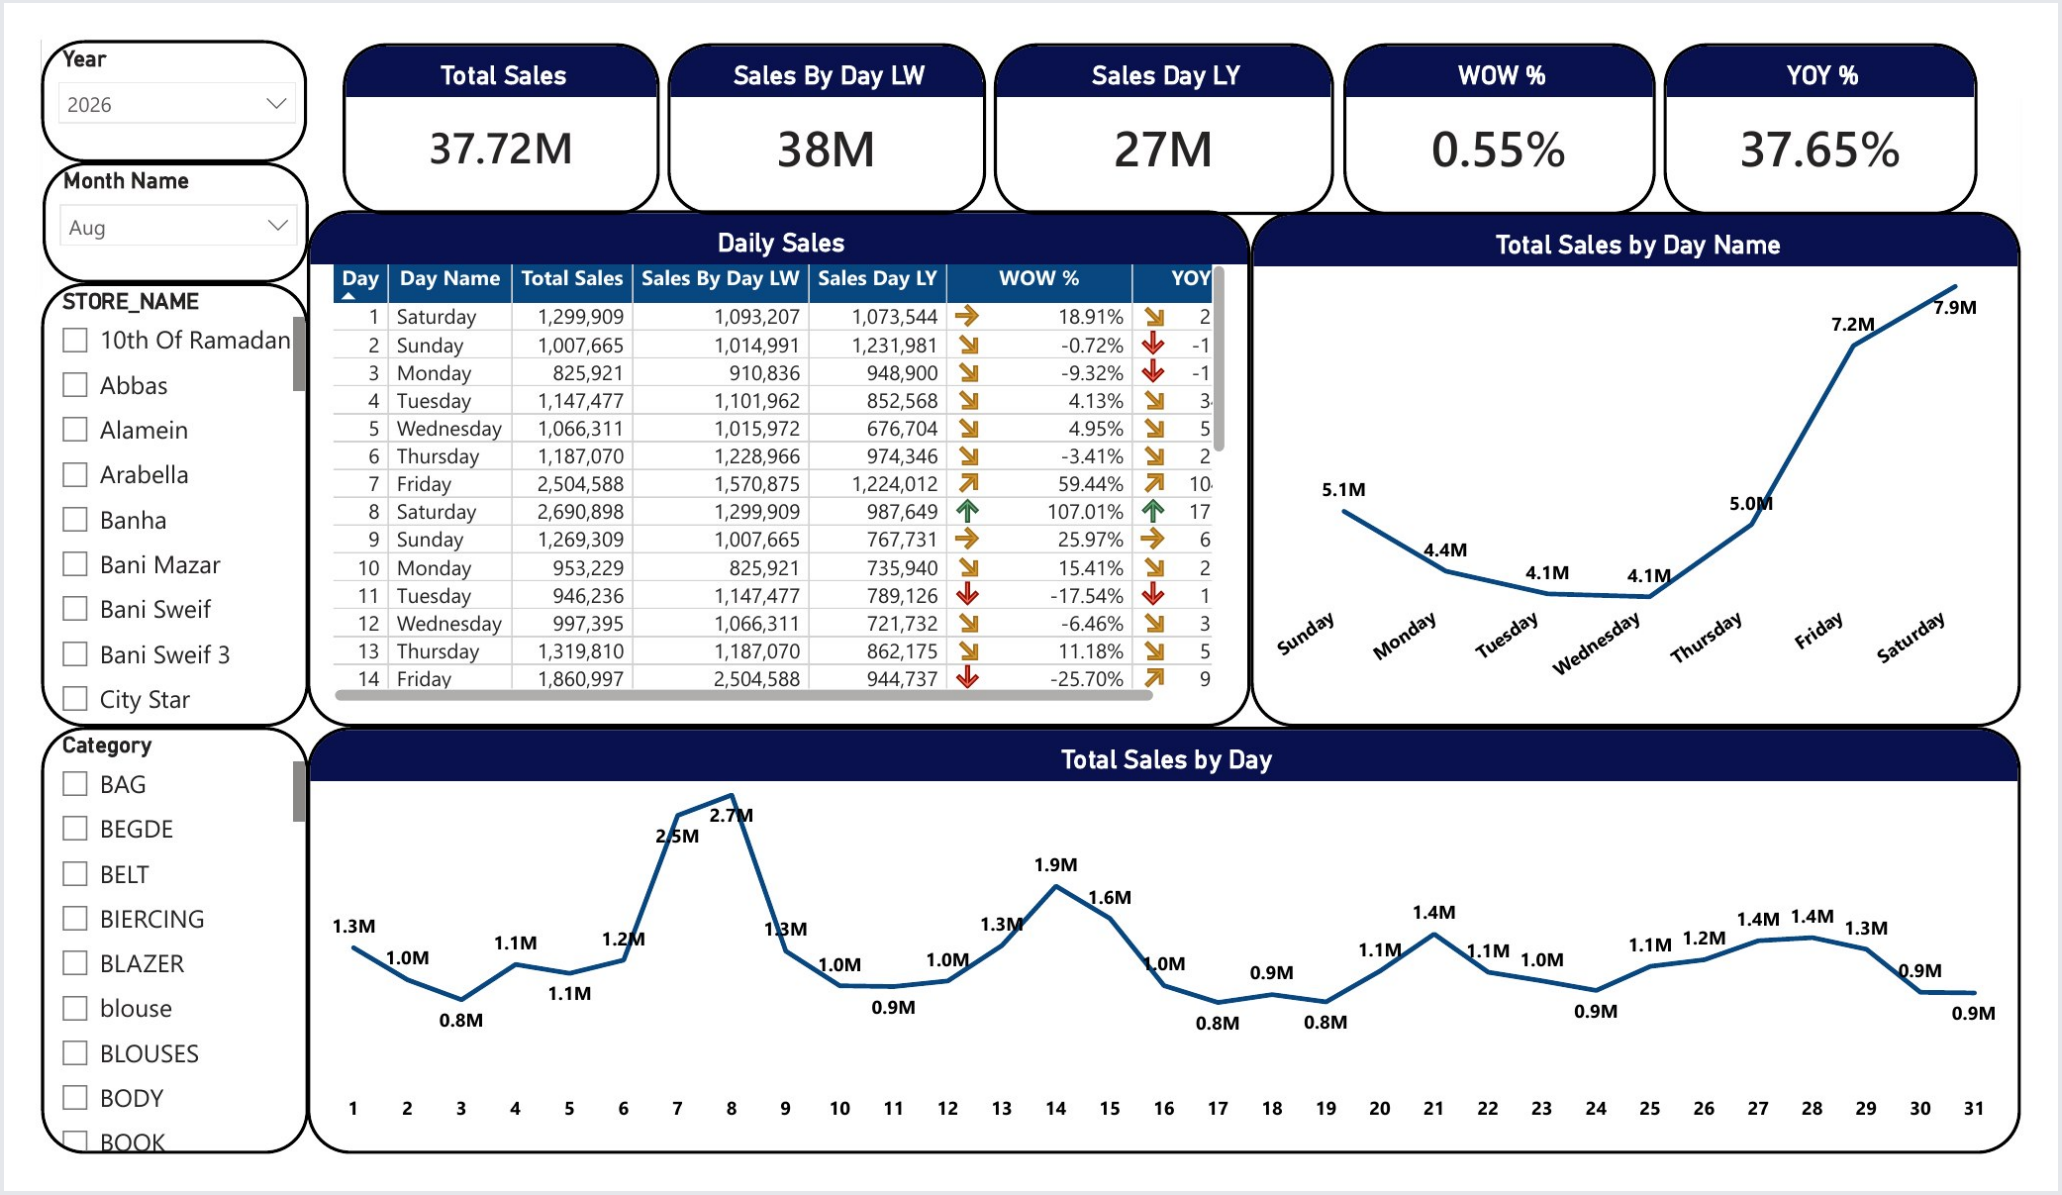

Sales Performance

MTD and YTD sales vs last year by store and category, with difference %

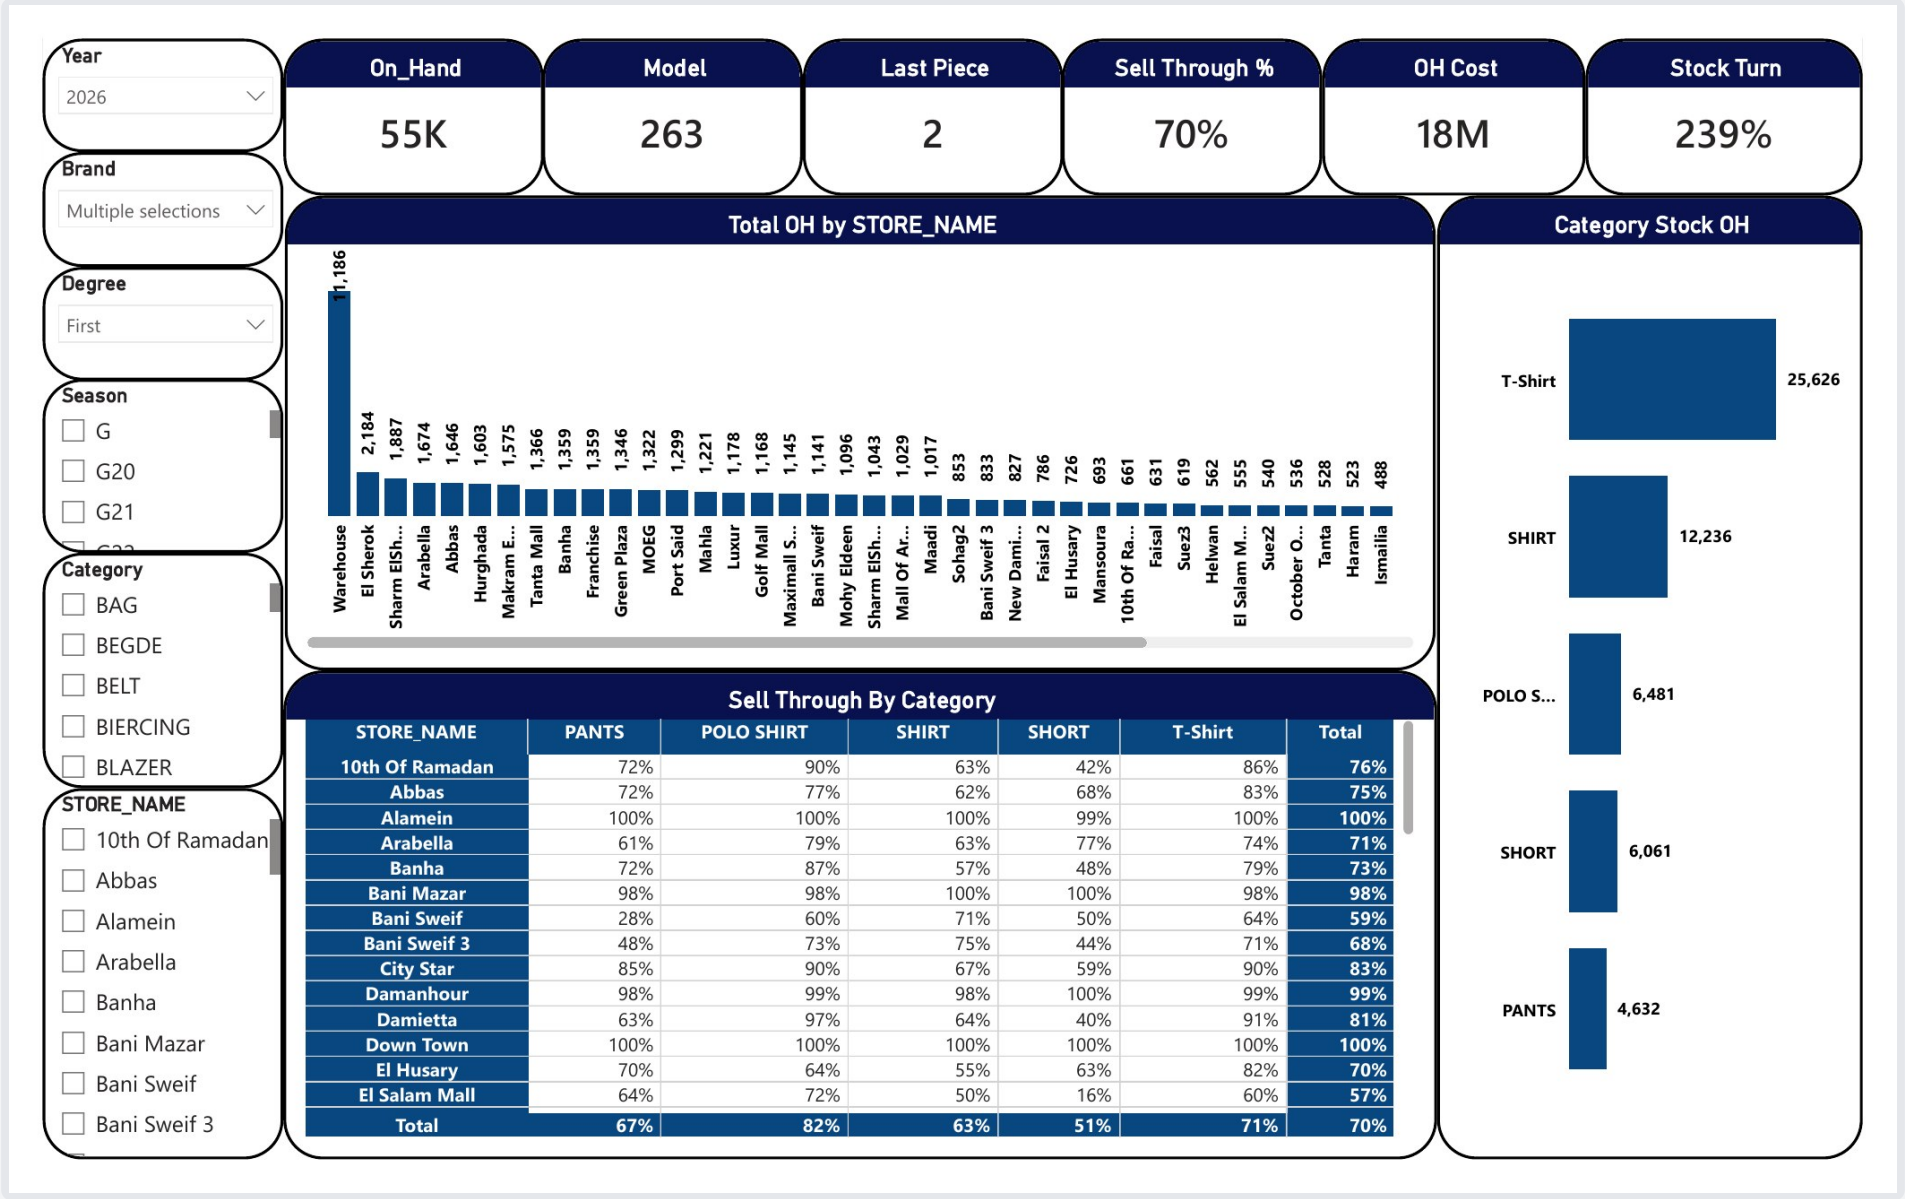

Daily Performance

Day-by-day sales with week-over-week and year-over-year comparison, plus sales by day of week

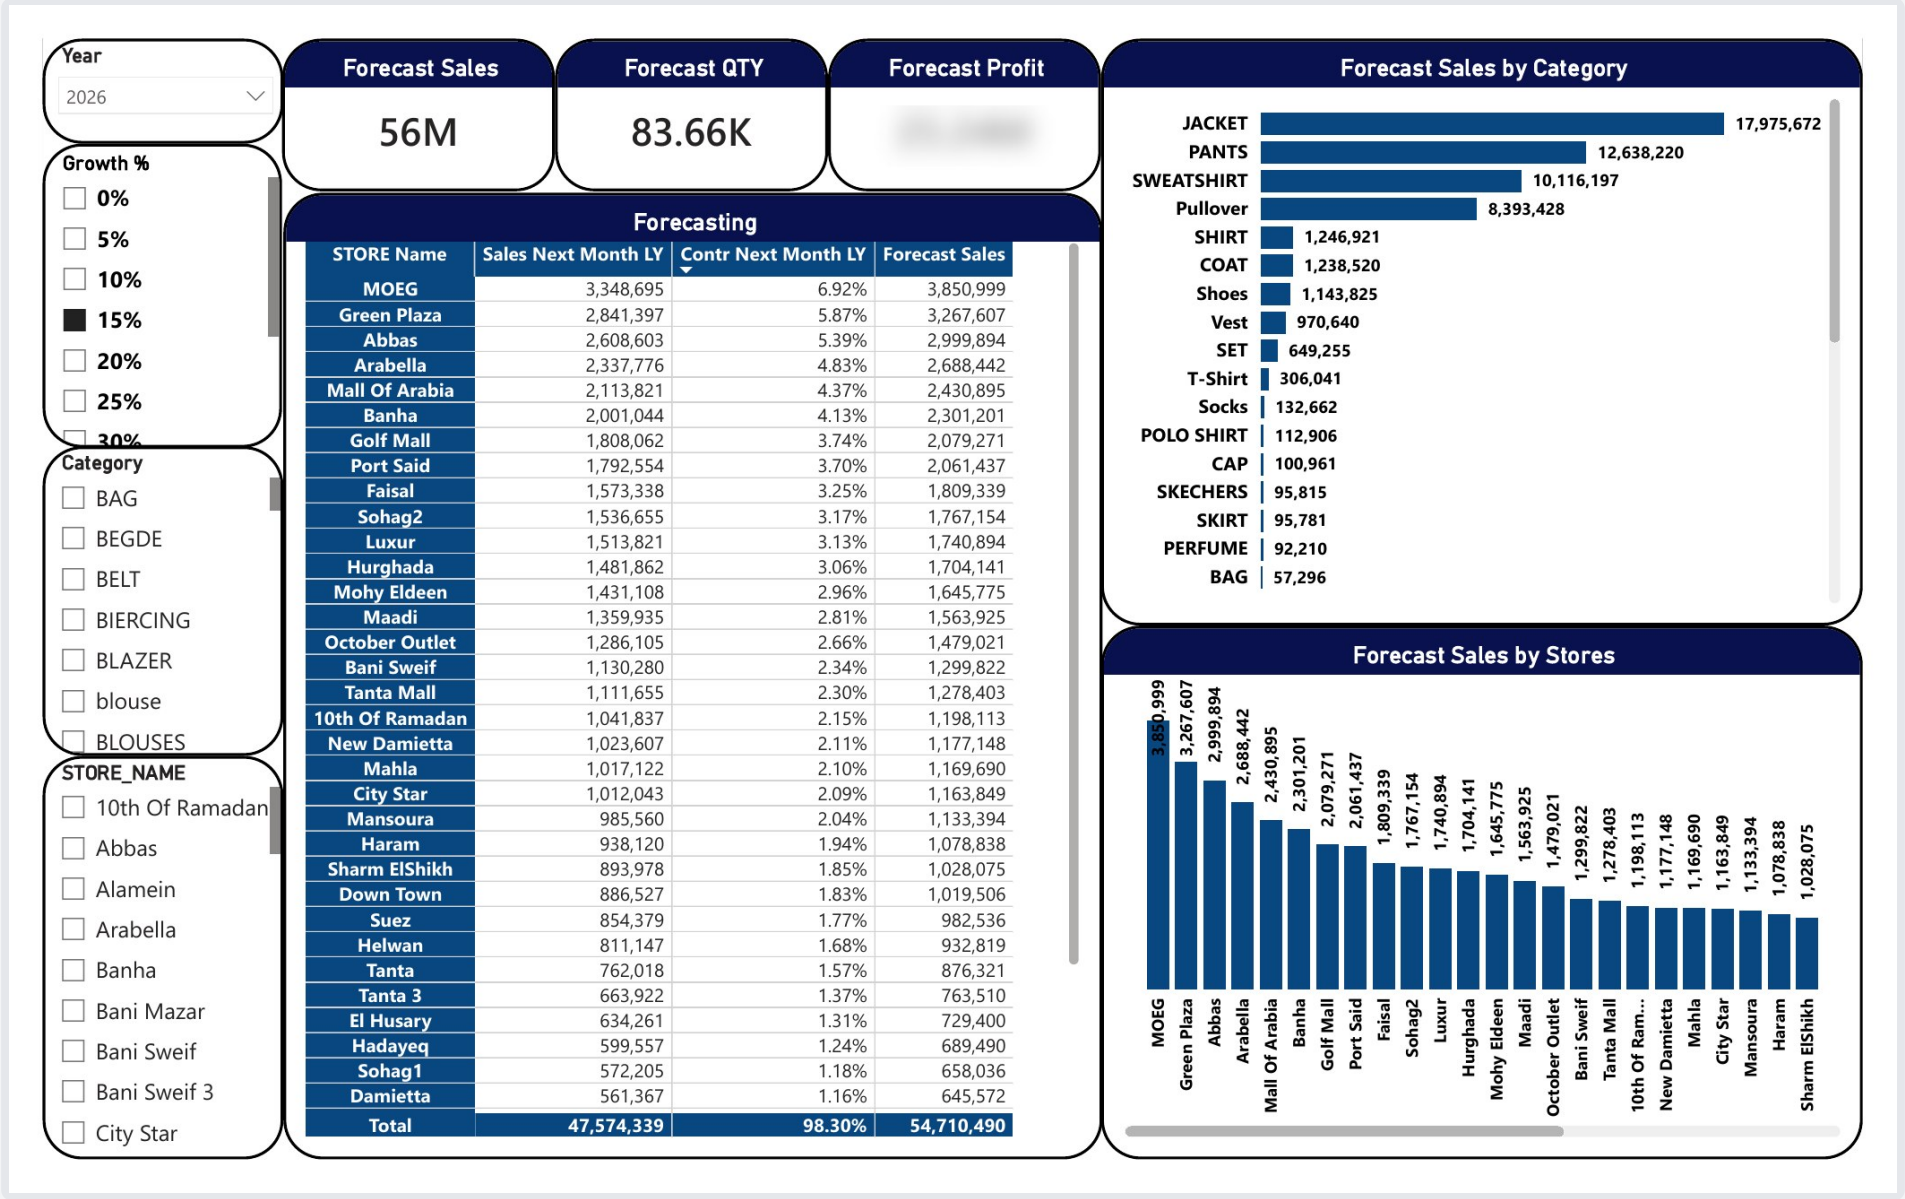

Inventory

On-hand units, sell-through %, stock turn, stock by store and category, sell-through matrix

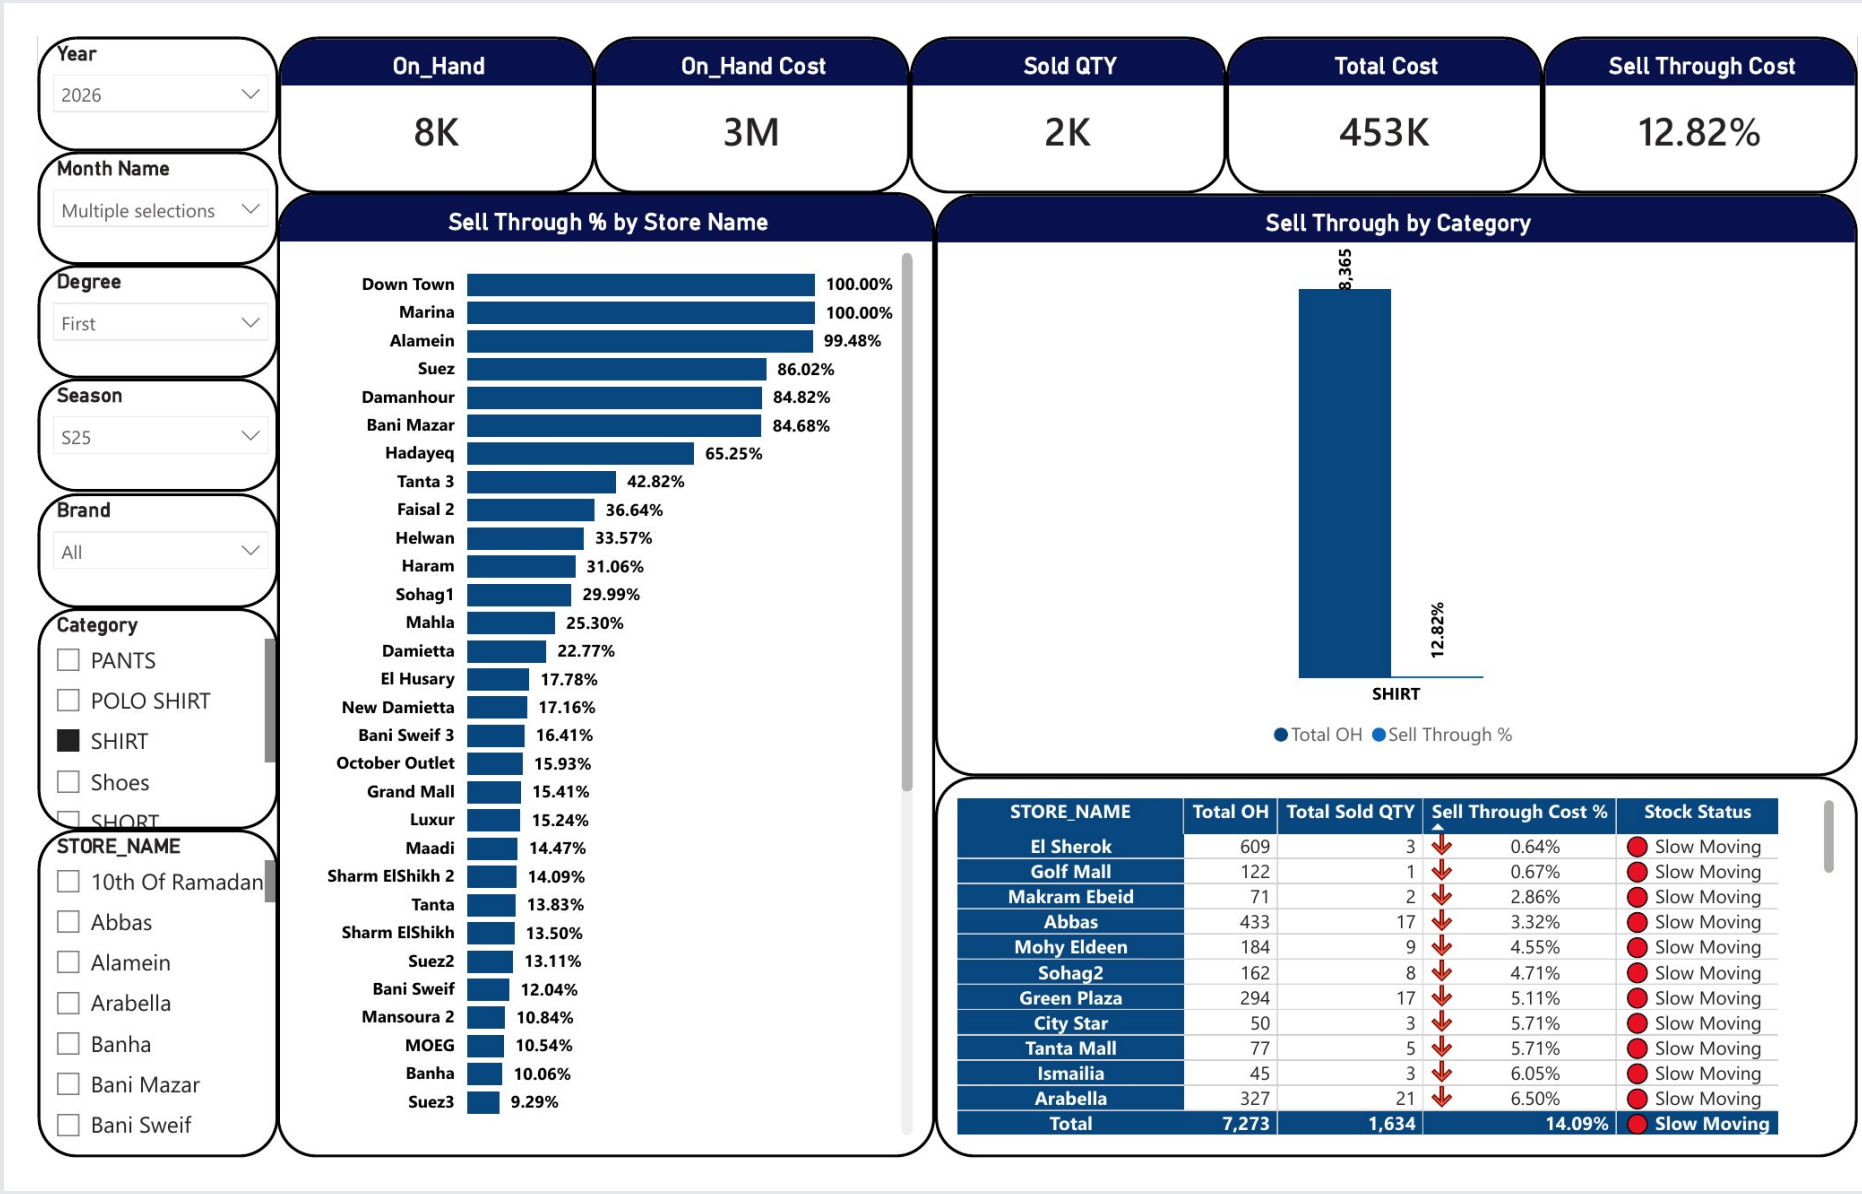

Forecasting

Next-month sales forecast by store and category, driven by a selectable growth %

Stock To Sales

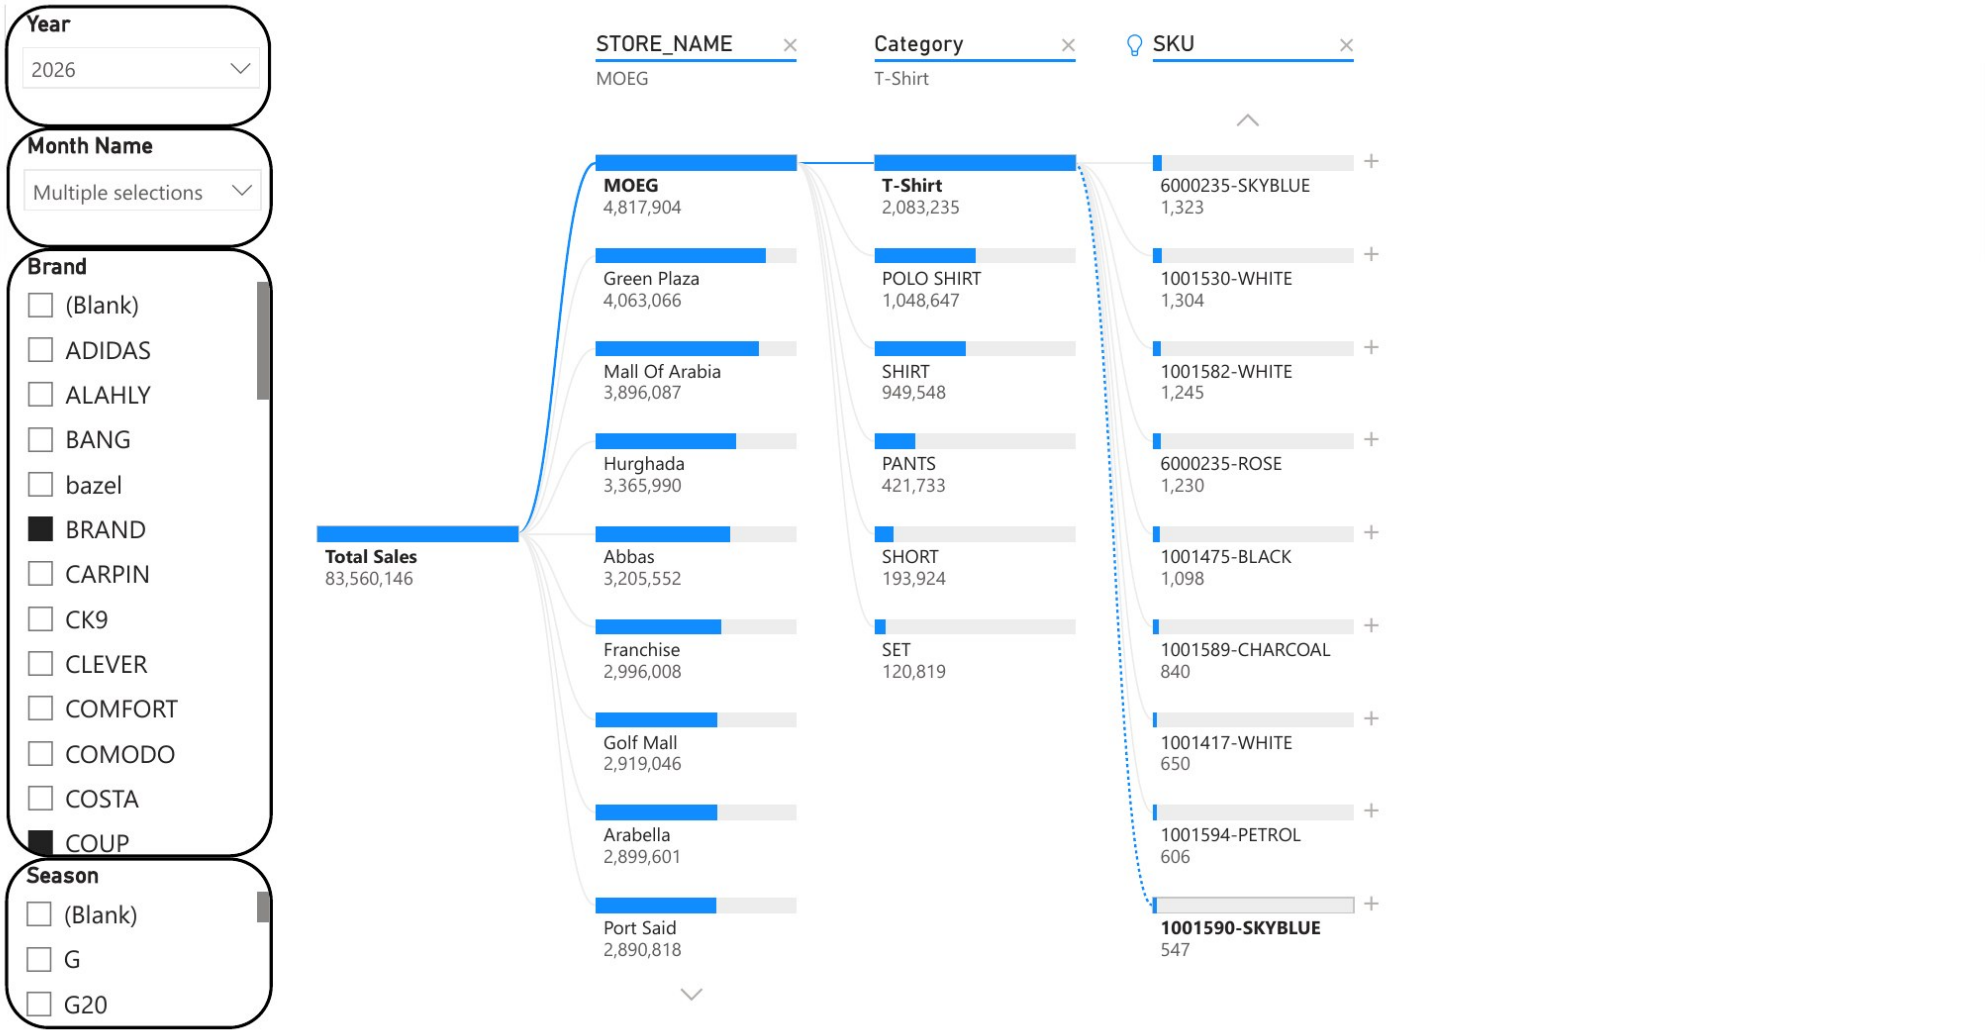

Sell-through by store for a selected season and category, with Slow Moving stock flags

STORE_NAME	Total OH	Total Sold QTY	Sell Through Cost %	Stock Status
El Sherok	609	3	0.64%	Slow Moving
Golf Mall	122	1	0.67%	Slow Moving
Makram Ebeid	71	2	2.86%	Slow Moving
Abbas	433	17	3.32%	Slow Moving
Mohy Eldeen	184	9	4.55%	Slow Moving
Sohag2	162	8	4.71%	Slow Moving
Green Plaza	294	17	5.11%	Slow Moving
City Star	50	3	5.71%	Slow Moving
Tanta Mall	77	5	5.71%	Slow Moving
Ismailia	45	3	6.05%	Slow Moving
Arabella	327	21	6.50%	Slow Moving
Total	7,273	1,634	14.09%	Slow Moving

AI Insights

Key-influencers analysis showing what drives changes in total sales

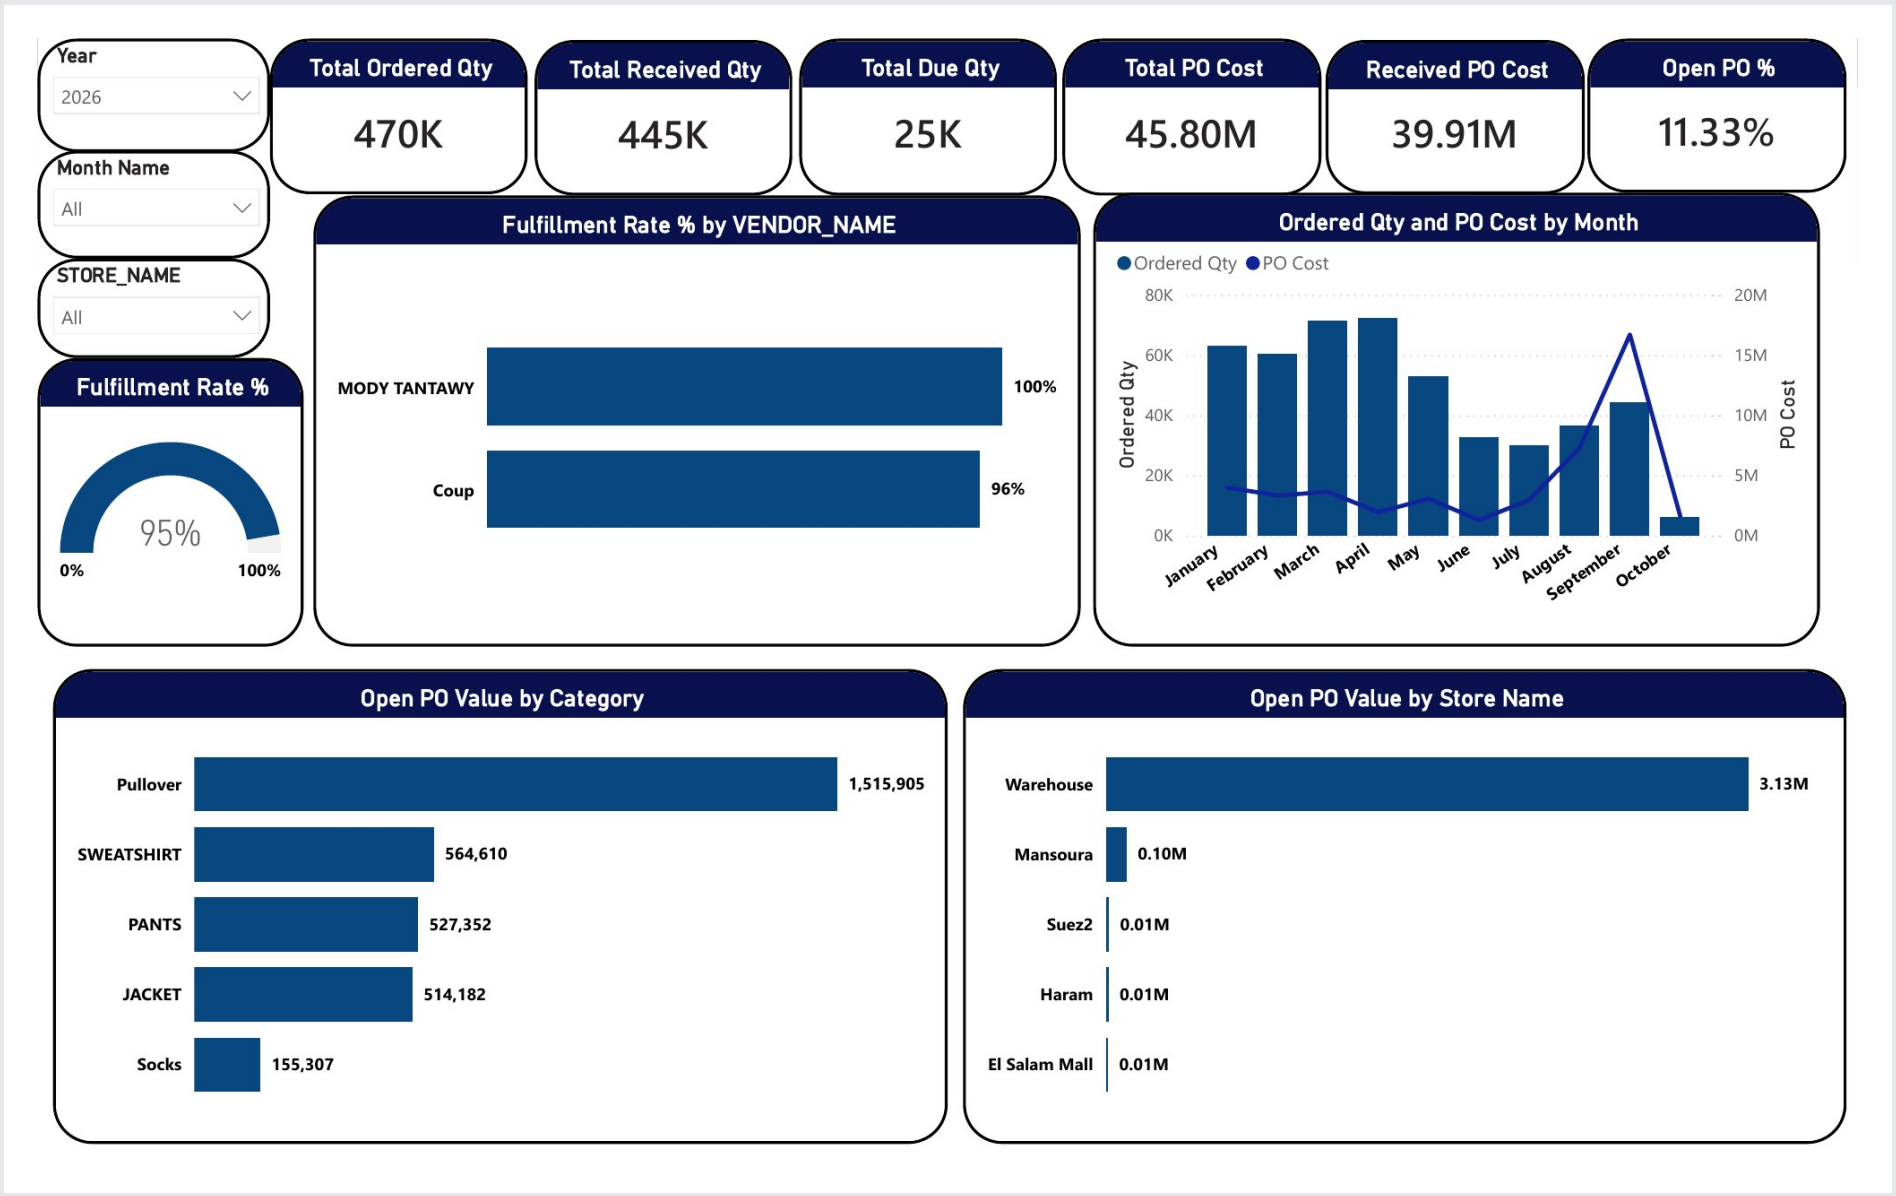

Comparison

Current vs previous period by store: quantity, sales, margin, transactions, and growth %

STORE_NAME	QTY Lasted	Sales Lasted	Qty Previous	Sales Previous	Sales Growth %	Profit Lasted	Profit Previous	Profit Growth %	Margin Lasted	Margin Previous	Margin Growth %	TRX Lasted	TRX Previous	TRX Growth %	AT Las

Purchase Orders

Ordered vs received quantity, fulfillment rate by vendor, and open PO by category and store

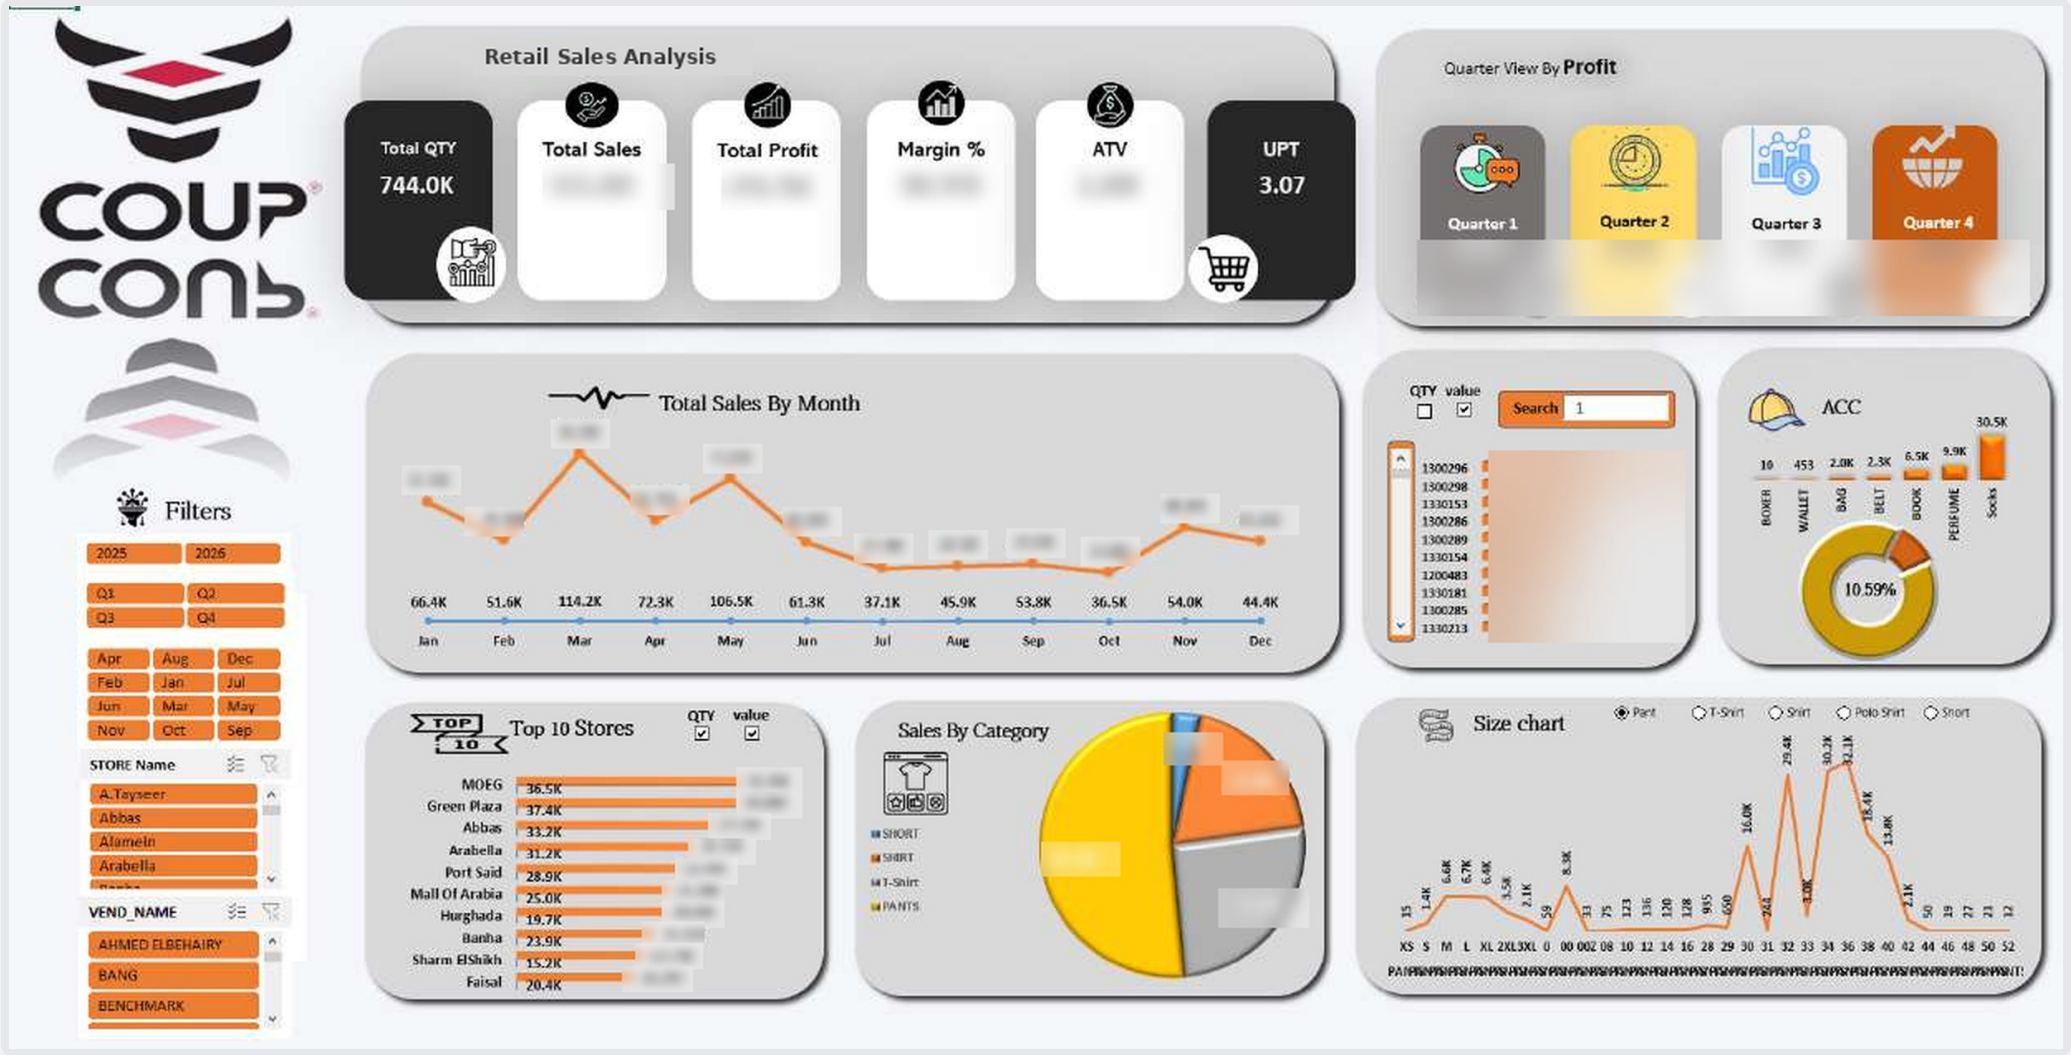

Financial

Daily sales vs expenses, expense breakdown by category and store, and net profit tracking

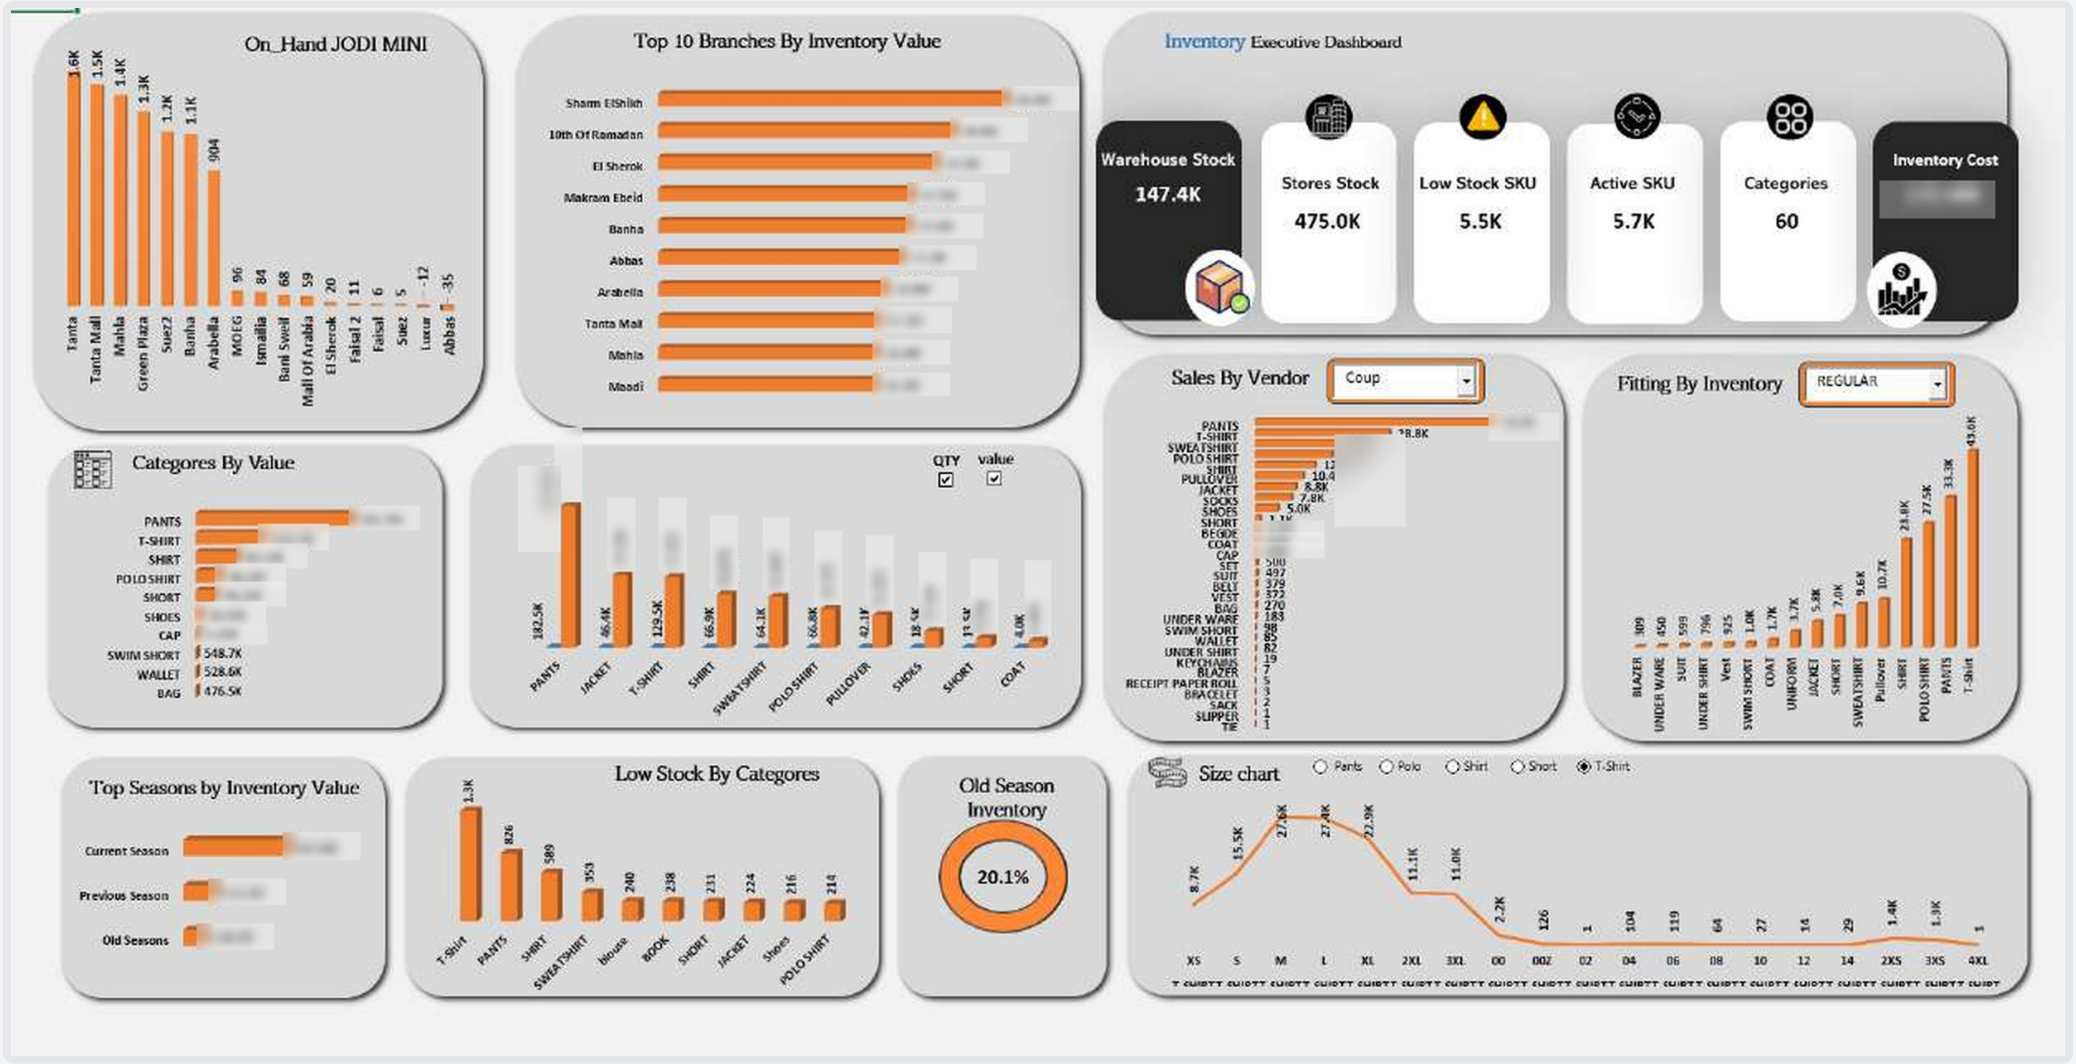

KPI – Sales

Quantity, sales, ATV and UPT, monthly trend, top stores, category mix, and size curve

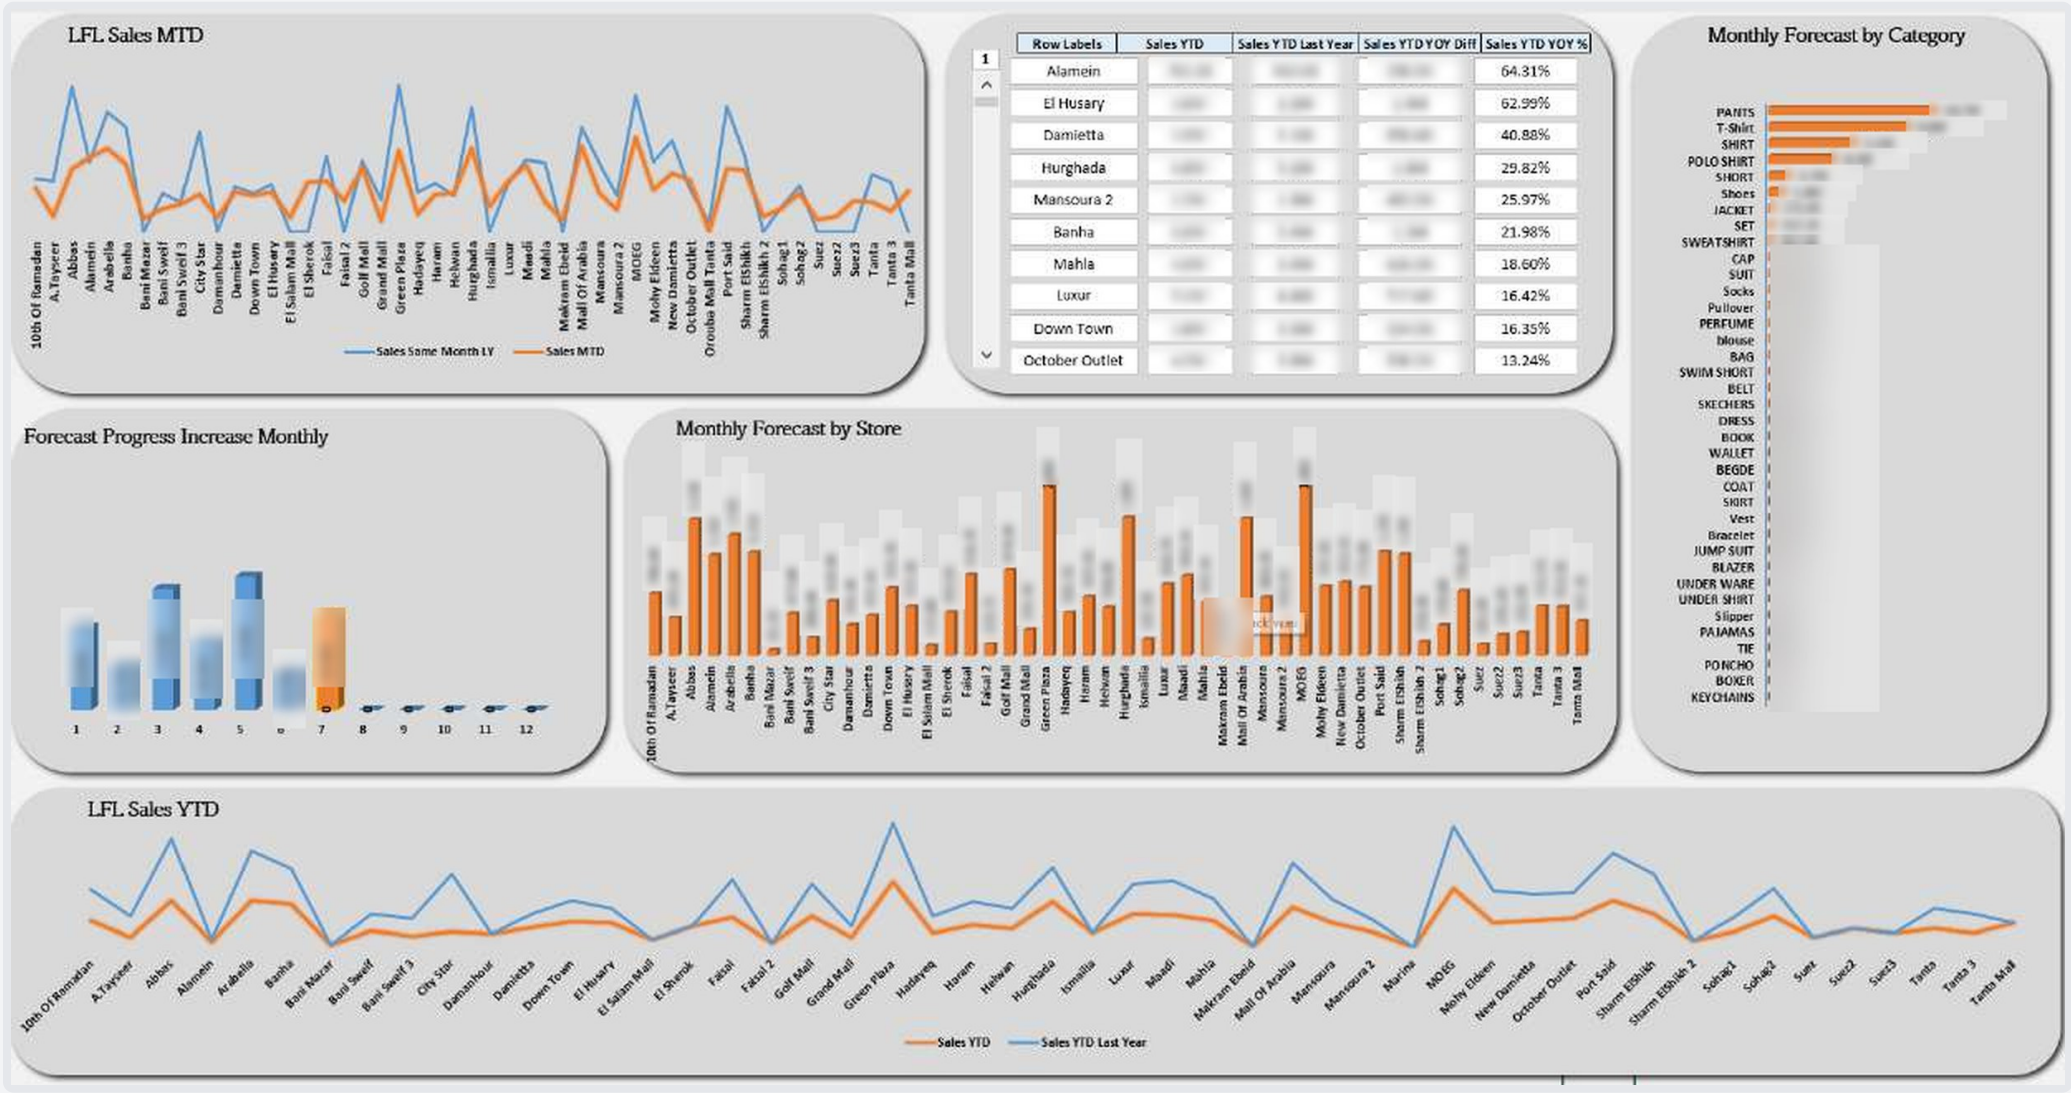

Inventory Executive Dashboard

Warehouse and store stock, low-stock SKUs, inventory value by branch, category, vendor, and season

Sales Executive – LFL & Forecast

Like-for-like MTD and YTD sales vs last year, store ranking by YoY growth, monthly forecast

Data Model

Relationships between Sales, Inventory, Vouchers, and Transfers and the shared dimensions
